MESSAGE

The Calabarzon Regional Development Council (RDC), through the Regional Statistics Committee, annually updates the Regional Social and Economic Trends (RSET) to provide sound and relevant statistics at the regional and sub-regional levels. The RSET is one of the Committee's major outputs in tracking the region's socio-economic development. It is also used by planners and decision makers in preparing development plans, policies, programs and projects.

The 2016 RSET includes some of the indicators in the Cities and Municipalities Competitiveness Index (CMCI) Survey. The CMCI Survey is an instrument that measures the competitiveness of the local government units in terms of economic dynamism, government efficiency, and infrastructure facilities. These additional selected indicators provide more details on the level of development of the local government units.

We would like to express our gratitude to the data source agencies for their continued support in this endeavor and the Philippine Statistics Authority for their coordination and consolidation of agencies' inputs. May this publication continue to serve as a tool for local planners, policymakers and investors.

LUIS G. BANUA

Chairperson, Regional Statistics Committee and
OIC-Regional Director, National Economic and Development Authority Region IV-A

MESSAGE

Data gathering is not easy. This is a task that is hard to do, but we need to in order to provide our users and other stakeholders basic data needed in preparing plans and making policies. Sometimes people may not appreciate what we do and most of the time question our data but we still continue to do our task unceasingly since we know the importance of our statistics.

It's been another year of collecting data. We thank again our data sources, the different government agencies who provided their administrative data, for the completion of this publication. We all did our best in providing some gender-based statistics, i.e. with male and female disaggregation, so that national and local government offices/units can make gender-sensitive plans and projects. Rest assured that we will add more gender statistics in the coming years. In addition, we included in this issue some indicators used in the 2016 City/Municipality Competitiveness Index (CMCI) ranking. We thank the National Competitiveness Council (NCC) for allowing us to include it in this publication.

With this year's National Statistics Month (NSM) theme "*Sustainable Development: Making Statistics Count*", we have different activities in order to make the public aware of the importance of our data. Other government agencies/offices have also lined up some activities for the NSM and we thank them for their support.

In the coming years, expect that we will be needing more data in order to measure our accomplishments in meeting the 17 goals, 169 targets and 230 indicators under the Sustainable Development Goals (SDG).

CHARITO C. ARMONIA

Vice-Chairperson, Regional Statistics Committee and
Regional Director, Philippine Statistics Authority IV-A

Chapter 1

Population and Housing

Data on size, distribution and demographic characteristics of the population are vital in planning and decision making process of the government and private businesses alike. The data can be of assistance in determining what, where, when and how public services and facilities should be put in place. The impact of services, programs and projects implemented are measured from the effect on the socioeconomic well-being of the populace as the fundamental beneficiaries of governance and development. Entrepreneurs, corporate executives and managers in the private sectors use the data in making decisions on how the resources will be distributed for their investment.

This chapter presents data series pertaining to the region and province, where available series include the population count taken during the 2007 and 2010 censuses conducted nationwide.

STATISTICAL TABLES:

Table 1.1	Total Population and Growth Rate by Province Censal Years 1948 to 2015	1-3

Chapter 2

Income and Prices

Data on the levels and patterns of family income and expenditure, poverty incidence and threshold and price indices are vital indicators of the socioeconomic status of the people. Specifically, these data provide a picture of the standard of living, the varying degrees of inequality, the purchasing capacity, and the demand for the goods and services of families. The data are essential in the conceptualization and assessment of poverty alleviation programs of government, private and non-government organizations. The data have become more significant to all sectors now that genuine efforts are being demonstrated in pursuing the social reform agenda. The trends, patterns and signals shown by the data have been given wide and serious attention due to the far reaching ramifications on policies and programs aimed at people empowerment. The usage of the data has accordingly permeated all echelons of the government bureaucracy, private businesses and even ordinary citizens themselves. With the support provided by the data, interventions can be implemented to help the citizenry respond to situations brought about by the increased prices and incidence of poverty and low income capacity, among others.

This chapter presents data for the region and by province pertaining to family income, expenditures and consumer price indices. Several indicators derived from these basic data such as poverty incidence and threshold, inflation rate and purchasing power of peso are presented in this chapter. The income, expenditures and price data are generated from the results of the Family Income and Expenditures Survey (FIES) and price surveys of the Philippine Statistics Authority. The poverty statistics, on the other hand, are computed using the results of the FIES by the PSA Technical Staff.

Chapter 3

Economic Accounts

The economic accounts of the region, which is presented in terms of the Gross Regional Domestic Product (GRDP), provide a comprehensive quantitative description of the regional economy. Specifically, the GRDP illustrates the level and growth of the region's economic output for a given period. Moreover, it shows the structure of the regional economy whether it is predominantly agricultural or industrial. It also highlights the sectors that contributed to and are of great potential to the region's growth. Lastly, the GRDP, as a macroeconomic indicator of economic performance, is not only essential in charting the socio-economic growth path of the region, but also essential in planning, policy formulation and analytical exercises.

This chapter presents the GRDP on an annual basis in terms of levels, growth rates, and indices at constant and current prices. The Philippine Statistics Authority generates the series from primary and secondary data gathered from various sources in the country.

Chapter 4

Environment and Natural Resources

The region's abundant and rich natural resources need to be protected and preserved and so there is a need for sound and effective policies for the proper management of these precious natural assets. Therefore, data regarding the environmental situation in the region is essential as a basis for proper formulation and design of conservation efforts to protect and conserve biodiversity. All these concerns give emphasis to the need for more reliable, timely and comprehensive data. The data are critical not only to the government and private sector but as well as the international community in their formulation of measures to safeguard the environment and natural resources and to remedy destruction and degradation to these areas.

This chapter presents data on existing/available land, watershed, and protected areas of the region and its provinces, as well as data on the production of forest products and non-metallic minerals. The data were generated from the Department of Environment and Natural Resources (DENR), specifically the Forest Management Bureau (FMB) and the Mines and Geo-Sciences Bureau (MGB).

Silica quartz	M.T.		
Soil (Garden)	Cu.M.		
Selected barrow	Cu.M.		

Note: 1/ Volume and value of production for the year 2005 were included in the Aggregates, etc. total.

2/ Refers to total for all aggregate products including banlic, base coarse, blasted rock and boulders.

Note: Changes on CY 2011 Data is due to 86 hectares damaged Congressional Initiative Assessment (CIA) of Pagbilao, Quezon.

Changes on CY 2012 data is due to transfer of 24 hectares planting site from SLEX (Batangas) to Calauag.

Changes on CY 2013 is due to transfer of all Barangay Forest Project (BFP) to year 2013 based on released funds.

Changes on CY 2014 data is due to 25 hectares of Calaca and 100 hectares of Pagbilao under Barangay Forest Project (BFP) were previously added to year 2014.

All Barangay Forest Project (BFP) areas in CY 2013 were already transferred based on the release of funds.

Chapter 5

Agriculture and Agrarian Reform

Data on agriculture and agrarian reform are vital in the formulation of programs and policies geared towards the development of the agriculture and fishery sectors. In fact, improving the condition of the agriculture sector is a priority thrust of the government today. This is anchored on the situation where agriculture still plays a major role in the growth and stability of the region's economy, as well as in its part in providing food for the survival of the population. This also means focusing on the agrarian reform program in order to promote social justice, sound rural development and industrialization. Hence, these data become the bases for the redirection of the focus of our legislators to the advancement of the agriculture and fisheries sectors. The data also provide indicators of the successes and impacts of strategies and programs in the lives of farmers and fisherfolks in the countryside.

This chapter presents data on palay, corn and other crops, livestock, poultry and fishery production, as well as data on the number of slaughtered animals in the region. These statistics are sourced from the Philippine Statistics Authority (PSA). Data on the implementation of the Comprehensive Agrarian Reform Program (CARP) were gathered from the Department of Agrarian Reform while data on cooperatives were taken from the Cooperative Development Authority (CDA).

Chapter 6

Establishment Characteristics: Industrial Sector

Data on the industries obtaining in the region and investments serve as gauge of the extent of the area's attractiveness and capability to absorb entrepreneurial ventures. An analysis of the data on the size and growth of industries and the stock and flow of investments shows the enabling factors that provide or enhance the comparative advantages enjoyed by industries and investors in the area. On the other hand, the data can give indications of the limiting factors that hinder the entry, growth, and movement of industries and investments. With the data providing signals, the concerned governmental instrumentalities can formulate policies, enforce regulations and undertake infrastructure programs and other forms of assistance to business and prospective investors. Armed with the data, key decision makers in the government and the private sectors can also forge alliances to improve the business climate and environment. Ultimately, the policies and measures implemented as well as the alliances can serve as instruments for achieving growth and providing employment opportunities, among others, to the region's labor force.

This chapter presents regional and provincial data where available, on the number of establishments by sector, distribution of manufacturing establishments, the number, floor area and value of private building construction and the value of investments and exports in the region. This also presents data indicators on the size of the local economy, capacity to generate employment and cost of doing business. The data sources are the Philippine Statistics Authority for the establishments and building construction data, the Department of Trade and Industry for the investment and export statistics, the Philippine Economic Zone Authority (PEZA) for the economic indicators, approved investments and value of exports within PEZA in CALABARZON and the National Competitiveness Council for the City/Municipality Competitiveness Index.

Chapter 7

Trade

Data on trade reflect the extent of the inward and outward flow of commodities in an area. The data likewise indicate the commodities that go into the export and import markets or are used for domestic or foreign consumption. Proprietors and the managers and executives of private businesses can use the data in identifying markets with high potentials and in making decisions on which commodities to produce and what markets to penetrate. Leaders and implementers in the government, on the other hand, can conceptualize and initiate programs, projects, services and facilities designed to further stimulate trading activities in high yielding areas and/or in those sectors where a demand and supply gap exists. The data are also useful in identifying areas and products that can be improved/promoted for global competitiveness.

This chapter presents data on the volume and value of commodities that enters ports located in the region either for exports or imports and the value of commodity flow by mode of transport. The Philippine Statistics Authority is the source of the data, which are processed from administrative reporting forms by agencies in government involved in the collection of customs and tariff charges, or administration of ports.

Chapter 8

Tourism

Data on tourism provide a panorama of the region as a tourist destination. The significance of the picture presented by the data manifests the importance accorded to the tourism industry by both national and local leaders. Specifically, tourism has become a twin source of foreign exchange receipts and livelihood and employment opportunities for communities. Data on the industry are therefore essential in providing vital links in the development and orchestration of campaigns aimed at promoting the potentials of the region as a tourist hideaway. Local leaders can put up infrastructure programs and institute policies and regulations that will boost the inflow of visitors. Investors, on the other hand, can take the signals by developing tourist and recreational sites and putting up establishments and amenities. The data provide likewise indicators that promote the area as a traveller's destination and its contributions to the economic performance of the destination.

This chapter presents regional and/or provincial data on the visitor arrivals and their countries of residence/origin and the number of hotel and hotel rooms and other accommodation establishments. The data was sourced from the different Provincial Tourism Offices, Local Government Units, Accommodation Establishments, consolidated by DOT Region IV-A.

STATISTICAL TABLES:

Chapter 9

Vital, Health and Nutrition

Data on vital events, health and nutrition are key inputs to programs aimed at providing the basic minimum services to the citizenry. The data provide a profile of the health status and the level, causes and patterns of mortality and morbidity of the population. The health and nutrition status of the people are an utmost concern of local governance. The focus of current development efforts is towards extending better services and expanding the delivery system even to the remotest rural communities. This is anchored on the concept that no individual should be deprived of the right to health care. Furthermore, the strength and well-being of the people influence their capabilities to engage in various economic endeavors. A cross analysis of the data with the demographic and socioeconomic information of the target population shows the existing and potential problems in an area. The health and nutrition status of the population should therefore be a priority in public service and resolved immediately so as to truly empower the people, an objective of growth and development. These concerns and objectives necessitate the provision of the data as bases in the delivery of services catering to the health and nutritional requirements of individuals.

This chapter presents statistics for the region and its provinces/cities on the registration of vital events occurring in the areas. The data include the number of births and deaths including infant, foetal and maternal deaths, and leading causes of mortality. This chapter likewise contains data on health facilities, bed to population ratio of hospitals and health workers. Meanwhile, the data on health and nutrition presented include the nutritional status of children and leading causes of morbidity. The data are sourced from the Department of Health.

Chapter 10

Education

Data on the country's educational system are essential in the planning, implementation, and supervision of programs in this field. The primary goal of the programs is to develop a meaningful and efficient educational system in the country. This is a priority thrust of the government today. The specific objective of educational programs is to update the quality of our educational system at all levels. Education is indispensable in bringing about the desired behavioral and attitudinal changes in the population to effect socioeconomic development. The far-reaching and enduring effects of a literate citizenry on individual and societal growth and progress call for serious efforts to continuously improve and promote the accessibility of our educational system to changes in the socioeconomic sphere and the demands of development initiatives pose a challenge to our decision-makers and educators. To address these challenges in the most efficient and effective manner, an adequate and timely supply of data focusing on the levels and state of resources and facilities and the accomplishments of our educational system is indeed vital.

This chapter presents data on important aspects of the educational system at the regional down to the division level. Each division is comprised of various cities and municipalities. The statistics presented include enrolment and number of schools and teachers by level and government or private and tertiary graduates by program. The chapter contains performance indicators, such as participation, retention, survival, completion, drop-out, and transition rates. The basic source of data is the EBEIS (Enhanced Basic Education Information System) of the Department of Education (DepEd).

Chapter 11

Labor and Employment

Data on labor and employment are critical inputs in the formulation of policies aimed at providing adequate employment opportunities and productive activities to the country's labor force. The labor force is the backbone of the economy. This single factor alone speaks of a vital sector that plays a crucial role in the development of the nation and the upliftment of the economic well-being of the people. Data on the situation obtaining in the workplace are also necessary in enhancing policies and programs of government towards promoting harmonious labor relations and productivity. The generation of adequate, timely and reliable data is an imperative need of the formulators and implementers of our laws, policies and decisions.

This chapter presents data on the number and employment status of the labor force at the regional level. The data presented include labor statistics by sex, class of worker, major industry group, type of industry, major occupation group, number of hours worked and highest grade completed. Data on labor relations and workers' welfare, which include the number of registered job applicants in the Public Employment Service Office (PESO) and number of workers terminated due to closures/retranchments, are also presented. The basic sources of data are the Philippine Statistics Authority (PSA) and the Department of Labor and Employment (DOLE). The PSA generates data on the labor force and its employment status using the results of its quarterly Labor Force Surveys.

Note: Details may not add up to totals due to rounding.

- No data available

The annualization of the LFS data for 2014 is based on agreement on the inter-agency committee on labor and productivity statistics. The annual estimates for 2014 which do not include Leyte are average LFS estimates of the three-quarter rounds only (April, July and October).

For 2015, the annual estimates do not include estimates from Leyte of Region VIII.

Table 11.9

**ESTABLISHMENT RESORTING TO PERMANENT CLOSURE/RETRENCHMENT DUE TO ECONOMIC REASONS AND DISPLACED WORKERS, CALABARZON
2011 - 2015**

Sex	2011	2012	2013	2014	2015
Establishments Reporting	48	32	80	106	319
Displaced Workers	758	1,129	1,996	4,539	22,351

Note: Numerous incidences of establishments resorting to permanent closure or retrenchment were unreported from the period of 2011-2013, which is responsible for the seemingly abrupt increase of figures in the latter years. The Department has started strengthening the monitoring of the establishments' compliance in 2014.

Chapter 12

Social Services

Data on social welfare serve as indicators of the results and impacts of goals, policies and programs on human development. This universal concern emphasizes people's empowerment and the care, protection and rehabilitation of the disadvantaged and special sectors of society. These sectors are the primary target clientele of our social welfare policies and programs. The objective is to place the disadvantaged sectors of society in the mainstream of productive and economic processes. Specifically, this entails converting the disadvantaged groups into active agents and partners in development. In this manner, the fruits of growth and progress will pervade all sectors of society and the disadvantaged sectors will become beneficiaries of development. The government's Social Reform Agenda (SRA) redirects the thrusts and focus and widens the target beneficiaries of the package of programs and other interventions implemented by government, private and non-governmental institutions. In contributing to the goals of social welfare and development, the generation of data and relevant indicators is therefore of utmost necessity. The SRA, for one, underscores the need to strengthen and improve existing systems for generating data.

This chapter presents data at the regional and provincial levels on the number of clients served by the various outreach and service programs of the Department of Social Welfare and Development. The department, which is the source of data, compiles the information based on its administrative reporting systems. This chapter also contains data on the number of disabled persons by type of disability. The Philippine Statistics Authority processed the data based on the results of the Census of Population and Housing.

Chapter 13

Transportation and Communication

Data on the extent and coverage of the transportation and communication networks of an area are essential. The data provide the planners and decision makers in the government and in entrepreneurial ventures with a sound basis to improve the state of their infrastructures. Specifically, planners use the data in the formulation of strategies that will link the locality with its neighbors within and outside the country. The different mode of transportation and channels and media for communication are vital in the economic, social and cultural lives of peoples and institutions in the community. A well-developed transportation system ensures fast and efficient transfer of goods and services between traders, households and other institutions within and outside the geographical limits of the community. Similarly, breakthrough in the communication system accelerates the flow of information. This era of information technology enables a faster access to and dissemination of news, events and developments in the domestic and international scene. The business community receives vital information that can expand the market for their products and services. The continuous provision of data on the transportation and communication systems of an area therefore becomes indispensable in charting the course towards socioeconomic development and cultural upliftment of the area.

This chapter presents data on modes of transportation at the regional and provincial levels. On the land transport, the data presented include the registration of motor vehicles and permits/licenses issued by the Land Transportation Office. The data presented also include the road length and the number and length of bridges. The Department of Public Works and Highways is the source of data. For the communication sector, the chapter provides data on the number of telecommunication facilities, licensed radio stations, telephone distribution, post offices and volume of mail handled. The sources of the data are the National Telecommunication Commission and the Philippine Postal Corporation.

STATISTICAL TABLES:

Chapter 14

Energy and Water Resources

Data on energy and water resources are vital inputs to national and local programs of government. The business/industry sector also uses the data in the preparation of feasibility studies and in investment planning. The importance of these resources in countryside development is recognized in many ways. Energy and water are essential resources in countryside development are recognized in many institutions operating locality. These resources are also vital in the day-to-day lives of individuals residing in the community. Considering the multifarious uses of these resources, the data on the level, extend, sources and utilization of energy and water provide signals on the potentials of the area to achieve growth and development. The data also serve as indicators of the standard of living of families comprising the community.

This chapter presents regional and provincial data on power and irrigation. Specifically, the data on power include the number of municipalities/barangays energized; power distributed and service connections by electric cooperatives. The data on irrigation include the number, service area, irrigator's associations and farmer beneficiaries of irrigation systems. The data sources for energy and irrigation are the National Electrification Administration, Department of Energy-Electric Power Industry Management Bureau and National Irrigation Administration.

Chapter 15

Public Administration

Data on the levels, patterns and distribution of the income and expenditure of local government units (LGUs) are essential in measuring their capabilities to provide public service to their constituents. Specifically, the level of income serves as a criterion in the classification of LGUs. The classification, on the other hand, provides a yardstick in the allocation of resources and other forms of assistance. Furthermore, the data provide a sound and logical basis in the choice of alternative options aimed at balancing the sources and disposition of resources. The data are also useful in identifying priority program areas and localities in the community.

This chapter presents data on the statement of income and expenditure of local governments. The said data is provided by the Bureau of Local Government Finance of the Department of Finance. The Bureau of Internal Revenue, on the other hand, provided data on internal revenue collections of LGUs. Data on the number of precincts and registered voters from the Commission on Elections are also presented.

STATISTICAL TABLES:

Chapter 16

Money and Banking

Data pertaining to the operations of financial institutions provide indicators of the area's economy. The growth in the number of banking institutions operating in a certain locality gives insights on the pace at which business and trade grows. Data on loans granted by banks provide a picture of the level and nature of investments put up over time. Statistics on outstanding loans of financial institutions, on the other hand, serve as signal of the rate of turnover of investments. The money and banking sector plays a vital role in the development of productive activities by proprietors or corporate institutions in the area. The presence and accessibility of establishments providing these services to existing and prospective investors contribute to the realization of programs and projects aimed at industrial and entrepreneurial advancement.

This chapter presents data on the number of offices of the financial system in the region, loan portfolio, operating and interest income and interest expenses by type of banks. The source of data is the Bangko Sentral ng Pilipinas.

Chapter 17

Public Order, Safety and Justice

Data on public order, safety and justice reflect the effectiveness, efficiency and fairness in the administration and enforcement of laws. The basic goal of the government is to establish a peaceful, stable and just environment conducive to national growth and development. A society where peace, order and law prevail is not only a goal or a vision. It forms one of the pillars of man's basic rights. Development that is not coupled with order, safety and justice contribute to the degradation of society. The effects of public order, safety and justice in national well being and in every fiber of the social and economic lives of individuals are priority concerns of governance. In this light, an information system that generates timely and reliable data becomes necessary tool in the administration of justice and enforcement of laws as well as to aid legislation.

This chapter presents regional and provincial data on crimes, number of policemen and firemen, and fire incidences, including deaths, injuries and property damages. This also includes data on disaster risk reduction and management. The sources of data are the Police Regional Office for data on crimes and law enforcers, Bureau of Fire Protection for fire incidences and fire personnel and the Office of Civil Defense for disaster risk reduction and management.
