As of May 1, 2020, the household population of Perez was recorded at 12,762 individuals, based on the result of the 2020 Census of Population and Housing (2020 CPH).

Of the total household population in 2020, 6,610 (51.8%) were males while 6,152 (48.2%) were females. By age group, 4,390 persons (34.4%) were under 15 years of age (young dependents), while persons aged 15 to 64 years (working-age or economically active population) totaled 7,647 (59.9%). Those in the age group 65 years and over (old dependents) comprised the remaining 725 persons (5.7%).

In 2015, persons aged 0 to 14 years, 15 to 64 years, and 65 years and above accounted for 37.1 percent, 57.7 percent, and 5.1 percent, respectively, of the total household population.

The sex ratio in Perez was computed at 107 in 2020. This implies that there were 107 males for every 100 females. In 2015, the sex ratio was the same at 107 males for every 100 females.

In 2020, children aged below 15 years had a sex ratio of 107 males for every 100 females, while those aged 15 - 64 years old had a sex ratio of 111 males for every 100 females. On the other hand, those aged 65 years and over had a sex ratio of 76 males for every 100 females. This implies a higher mortality rate among males than females or a longer life expectancy among females than males in the older age groups.
