### TECHNICAL NOTES

Private construction statistics are derived from the original application forms for building permits collected by PSA personnel from the offices of the Local Building Officials. Construction statistics generated relate to data on new constructions and additions, alterations and repairs of residential and non-residential buildings and other structures undertaken in Quezon province.

The following limitations of the data should be taken into consideration by the users:

- Data on private building constructions refer to those proposed to be constructed during the reference period and not to construction work completed during the reference period. Also, the data do not include reports from other municipalities whose building permits were not collected/submitted.
- The completeness of the number of building permits collected relies on the approval of applications filed with the Office of Local Building Officials (LBOs). Hence, private building constructions without approved building permits are excluded from the tabulation.
