

SPECIAL RELEASE

Age and Sex Distribution in Mauban (2020 Census of Population and Housing)

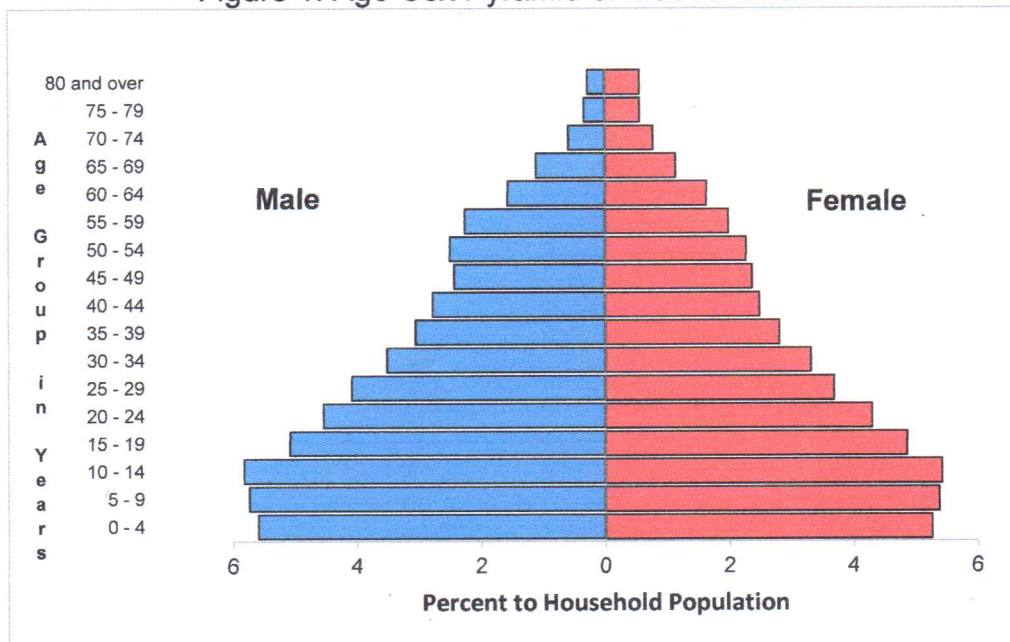

Date of Release: 19 July 2024
Reference No. 2024-109

As of May 1, 2020, the household population of Mauban was recorded at 70,990 individuals, based on the result of the 2020 Census of Population and Housing (2020 CPH).

Of the total household population in 2020, 36,411 (51.3%) were males while 34,579 (48.7%) were females. By age group, 23,572 persons (33.2%) were under 15 years of age (young dependents), while persons aged 15 to 64 years (working-age or economically active population) totaled 43,637 (61.5%). Those in the age group 65 years and over (old dependents) comprised the remaining 3,781 persons (5.3%).

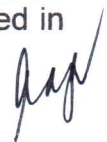

In 2015, persons aged 0 to 14 years, 15 to 64 years, and 65 years and above accounted for 33.9 percent, 61.0 percent, and 5.0 percent, respectively, of the total household population.

Figure 1. Age-Sex Pyramid of Mauban: 2020

Source: Philippine Statistics Authority, 2020 Census of Population

Moreover, there were more males (92.4%) than females (90.5%) among the 0 to 59 age group. Meanwhile, for older age group (60 years and over) females (9.5%) outnumbered the males (7.6%). The same trend was also observed in 2015.

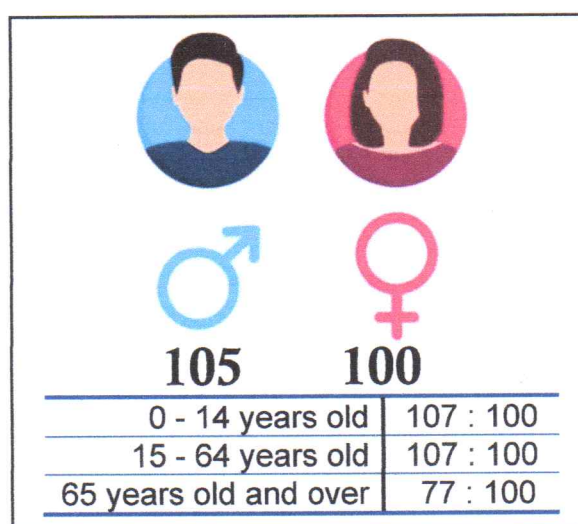

Sex ratio stands at 105 males per 100 females

The sex ratio in Mauban was computed at 105 in 2020. This implies that there were 105 males for every 100 females. In 2015, the sex ratio was the same at 105 males for every 100 females.

In 2020, children aged below 15 years and those aged 15 - 64 years old both had a sex ratio of 107 males for every 100 females. On the other hand, those aged 65 years and over had a sex ratio of 77 males for every 100 females. This implies a higher mortality rate among males than females or a longer life expectancy among females than males in the older age groups.

Figure 2. Sex Ratio by Selected Age Group: Mauban, 2020

Median age increases to 23.9 years

The median age in Mauban was computed at 23.9 years, which means that half of the household population were younger than 23.9 years, while the other half were older than 23.9 years. The median age of 23.5 posted in 2015 was lower compared to 2020.

Dependency ratio declines to 63 dependents per 100 persons in the working age-group

The dependency ratio in Mauban was computed at 63, which indicates that for every 100 working-age population, there were about 63 dependents (54 young dependents and 9 old dependents). This is lower than the dependency ratio in 2015 at 64 dependents (56 young dependents and 8 old dependents).

**Table 1. Age Dependency Ratio of the Household Population by Sex:
 Mauban, 2020 and 2015**

Age-Dependency Ratio	2020			2015		
	Both Sexes	Male	Female	Both Sexes	Male	Female
Over All	63	61	64	64	62	66
Young	54	54	54	56	55	56
Old	9	7	10	8	7	10

**Details may not add up to total due to rounding.*

There are more males than females among children under five years old

Children below five years old comprised 10.9 percent (7,707) of the household population. The sex ratio was computed at 106 males for every 100 females.

65 years and over	3,214	1,398	1,816	5.0	4.3	5.8	77

About two in every five household population are of school age

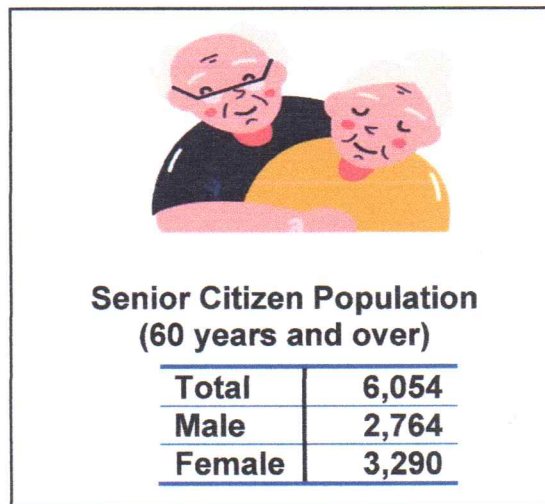

The school-age population (5 to 24 years old) accounted for 29,185 persons (41.1%) of the 70,990 household population in Mauban. This total is higher

compared to the 26,427 (41.4%) school-age population that was reported in 2015.

Senior citizens constitute 8.5 percent of the household population

People aged 60 years old and over are regarded as senior citizens in the Philippines. They made up 8.5 percent (6,054) of the household population in 2020. There were more females (3,290 or 54.3%) than males (2,764 or 45.7%) among the senior citizens. The same trend was observed in 2015 where females (2,671 or 53.6%) outnumbered their male counterpart (2,314 or 46.4%).

Figure 3. Senior Citizen Population by Sex: Mauban, 2020

Less than half of the female population are of reproductive age

Women of reproductive age (15 - 49 years old) totaled 16,881 or 48.8 percent of the 34,579 female household population in 2020. In 2015, there were 15,214 females of reproductive age, comprising 49.0 percent of the female household population during the year.

Figure 4. Percent Distribution of Female Population of Reproductive Age: Mauban, 2020 and 2015

About 61.0 percent of the household population are of voting age

The voting-age population (18 years old and over) accounted for 60.7 percent (43,126) of the household population in 2020, up from 59.7 percent (38,061) in 2015.
